NASHVILLE, Tenn., Aug. 10.-Hon. Howell Edmunds Jackson, associate justice of the supreme court of the United States, died at his residence at West Meade, 6 miles west of this city, Thursday afternoon, in the sixty-

HOWELL EDMUNDS JACKSON. Judge Jackson had been in failing health for the past four years, but it has been only within the past eight or nine months that the progress of the disease began to cause his family and friends uneasiness. Last year he went on a lengthy trip to the far west in search of health. Later he went to Thomasville, Ga., where it was hoped the mild and yet bracing climate would restore his one-time vigorous constitution. The trip did him little good, and, after a time he was brought home. At his old home Judge Jackson seemed to improve slightly until he went to Washington to sit in the second hearing of the income tax cases. He stood that trying trip only taily well, and after his return home appeared to lose strength rapidly. Nevertheless, Judge Jackson never took to his bed until last week. Since that time his family and friends saw that the end was near, and his death was not unexpected.

Howell Edmunds Jackson was born in Paris. Tenn., April 8, 1832, so that he was in his sixty-fourth year at the time of his death Justice Jackson was a classical scholar, graduating from the West Tennessee college in 1818 He studied law two years at the University of Virginia, and in Jackson, under his kinsmen Judges A. W. Totten and Milton Brown. He graduated from the Lebanon law school in 1856, in which year he located in Jack-son and engaged in the practice of his profession; removed to Memphis in 1850, where he continued the practice of the law: served on the supreme bench by appointment on two occasions, and was once a prominent candidate for supreme judge before the nominating convention; located in Jackson in 1676; was elected to the state house of representatives in 1880 on the state credit platform: was elected to the United States senate as a democrat in 1881, and served till April 12, 1886; was appointed United States circuit judge by President Cleveland, and nominated for associate justice by President Harrison: 1963, and entered upon the duties of the office March 4, 1893. The last time Justice sion of the rehearing in the income tax cases last May. He had been absent from the city and from the bench since the preceding fall. when, soon after the convening of the October term of the court, he was compeled to go south on account of his rapidly declining health. During his absence there had been contradictory reports as to his physical condition, but the prevailing opinion among his colleagues on the bench was that he would never again be able to resume his seat.

As senator and justice of the supreme court

Mr. Jackson had resided in Washington about eight years. His associates there were confined largely to his colleagues on the beach and in the senate chamber. By them he was universally esteemed as a man of high moral was evidenced in nothing so much as his appointment to the supreme beach by President Harrison and his confirmation by a republican senate, notwithstanding he was a democrat.]

Executive Condolences. BUZZARDS' BAY, Mass., Aug. 10 .-The following telegram was sent by the president:

BUZZARDS' BAT. Mass., Aug. 9, 1895. TO MRS. HOWELL E. JACKSON, NASHVILLE, TENN .- I deeply sympathize with you in your terrible bereavement, while I mourn the death of a devoted friend and the nation's loss of a wise and upright judge, a useful citizen and an GROVER CLEVELAND.

POLITICAL PROBABILITIES.

Looking to the Elevation of Secretary Car lisie to the Presidency.

FRANKFORT, Ky., Aug. 10. - Some extraordinary speculation is being indulged in by politicians on the probatice Howell Jackson, and, if Mr. Clevefand does as many of those in a position to know say he will, Kentucky will have the most sensational cam-

It is generally accepted as a fact in this state that Secretary Carlisle is the administration's candidate for the democratic presidential nomination, and Mr. Cleveland has in more than

Politicians here believe that the run Secretary Carlisle for the senior Judge Lindsay. If in the face of the manifest free silver sentiment in Kentucky, Mr. Cadlisle is elected senator standard basis, then, of course, the prestige he gains in this way will boost him along the line for the presidential nomination.

THE BRITISH MINISTRY.

Lord Salisbury's Intentions Regarding China Approved-The Queen's Speech. LONDON, Aug. 10.-Lord Salisbury presided at a meeting, at the cabinet office, of all the members of his cabinet. The cabinet approved of all of Lord Salisbury's intentions respecting China, which he explained to of. When fowls are afflicted with such the ministers. The queen's speech, to diseases as roup or any other putrid afbe delivered at the opening of parlia- fections, charcoal is of great service, ment, was submitted to the council and was approved. The speech will be submitted to the queen at Osborne by purifying the blood and toning up house, the of Wight.

REAR ENDED.

A sleeper Wrecked and Burned, But No | cat it, but all that is necessary is to to keep the fowls warm by shutting | my brother doctors.

MOBERLY, Mo., Aug. 10. - About midnight, while it was standing at Dalton, a station about 95 miles east of Kansas City, the Kansas City-St. Louis eastbound Wabash express train was run into from the rear by an extra freight train, which was following it to Mo-

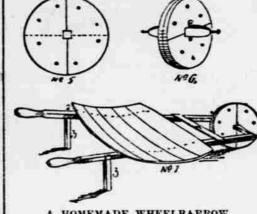

The rear sleeper was wrecked and destroyed by fire. No passengers were

The collision also damaged the engine of the freight.

AGRICULTURAL HINTS.

CHEAP WHEELBARROW. It Can Be Made at Home on Wet Days o in the Evening.

Lav two pieces of white pine or hemlock boards side by side. With a the ponds until they are fully feathpencil and piece of string draw a ered. circle, using the crack between the boards for the center. Next saw out ing done this, repeat the operation, using the first for a pattern. The square hole should be sawed out before nailing the wheel together. Nail the four pieces together, taking pains to have the cracks cross each other. Make a square piece to fit the axle hole, securing it in place with wooden too fat to lay well. pins on either side of the wheel, as shown at No. 6 in cut. The handles may be made of almost any material at hand having sufficient strength, and consist merely of two straight pieces, about 41/2 feet in length, smoothed off at the ends to fit the aand. The body of the barrow is

A HOMEMADE WHEELBARROW. made of berrel staves. In order that the staves may retain their original curve, thus giving the body its proper dish shape, blocks should be nailed to the handles having a gradual curve starting from the inside. Bore a hole in the wheel end of each handle and drive a large wire or wire nail through the hole into each end of the axle. A few blows of the hammer give it a pair of legs, and the barrow is complete. By the application of a little grease on the axles occasionally the barrow will be found to work more satisfactorily. -Rural New Yorker.

RAISING CALVES.

It Is What Every Wide-Awake Farme

Should Do. Farmers who sell or ship their milk asually raise few calves, thinking it is cheaper to buy cows than it is to raise them. But are we as apt to get as good cows? If a farmer sells cows it is his poorest ones he wants to dispose of. Whereas, if we raise our own cows we raise the calves from our best cows, and by using a blooded bull we stand fair chance of improving our daily herd. As to feeding calves, it is not ridge made of cornmeal, ground buckwheat, wheat bran and linseed meal, number of eggs placed in the machine. Four quarts corn meal, four quarts wheat bran, two quarts ground buck- will seldom live after the tenth day. wheat, and about two handfuls of linseed meal. We begin using about one heaping tablespoonful for each mess; make the porridge with water, add a pinch of salt and one quart of sweet milk. Increase the amount of grain as the calf grows older. Care should be taken not to get the calves too fat. When raising calves for cows they should be fed just enough to keep them growing and in good flesh, but not too fat. Calves kept fat while growing are not as apt to make as good cows as those that are just kept in a good growing condition .- N. Y. Tribune.

The Teeth of the Colt. In the colt the incisor and the first three molars on each jaw are always temporary and replaced by permanent teeth some time during the animal's life. The last three molars are always permanent and are never replaced. The teeth make their appearance as follows: The two middle incisors and the first three molars make their appearance before or some days after birth, the first laterals four or six weeks after birth, second laterals or corner teeth six or nine months after birth, the fourth molar (first permanent one) is cut at from ten to twelve months of age. At two and one-half years the middle incisors and the first bie action of President Cleveland in and second molars are replaced. At appointing a successor to the late Jus- the same time the fifth molar is cut. At three and one-half the first lateral incisors and the third molar are replaced. At four and one-half the corner teeth are replaced, and the sixth paign this fall in the history of the molar is cut. In case of a male the canine teeth are also replaced at four and one-half.

Clover Plants and Nitrogen. The bacteria on the roots of the clover plants which store up nitrogen one way shown that his choice was are more numerous and active when the plant is young than when it is old, and having the plant in the soil, it president will appoint Senator Wil- would be best to let it remain there liam Lindsay, of this city, to fill the until it was nearly mature, or until its vacancy caused by the death of Jus- active period of growth had passed. tice Jackson. Then the scheme is to Soon after crimson clover begins to bloom it ceases to produce nitrogen. senatorship which will be vacated by With red clover it is different, because it is a biennial; that is, provided the borers and the clover seed midge do not destroy it. In recent years in cenon a sound money, or single gold tral New York it is impossible to get more than one crop from it on account of the ravages of the root borer. The second crop of red clover plowed under when in bloom will be at the period when its beneficial influences have measurably ceased. The first crop should be cut for hay. The second erop wili be worth nothing for seed or account of the clover seed midge.

> Charcosi in the Poultry Yard. Charcoal is one of the best disinfect ants and purifiers of the animal sys-

tem we have, or at least that we know as it helps greatly to purify the digestive organs and acts as, a stimulus the system in general. It does not need to be crushed up fine, mixed with reak it up in small pieces, conv for them to swallow.-Farmer's Voice.

A New Food for Cattle.

Cocoa husks have been found to have an agricultural value about equal to that of cotton cake. Trial experiments have shown that as a cattle food | The price paid was a trifle less than 85 they are both palatable and digestible, and contain 35 per cent. of nutritive matter, while the nitrogen, phosphate and potash they contain render them valuable as manure.

AMONG THE POULTRY.

WHOLE wheat is better for growing fowls than corn.

THERE are few kinds of poultry that pay better than guineas.

Do NOT allow the ducklings to go to

DRY, clean earth makes one of the very best materials that can be used the circle with a compass saw. Hav. in the nest boxes during the summer. LIME will kill lice; it is a good disinfectant; it will purify the air; it will make the poultry house clean and free from vermin.

> OATS stimulate without enervating or fattening. They form a good ration to reduce the fat of hens that are

FEATHER pulling is largely due to idleness. It is most liable to occur in

and have little exercise. THE only hens that it will pay to keep through the winter are those that can be relied upon for winter layers or that are needed for breeders.

In raising poultry for market the profit lies in hatching early, pushing the chickens forward as much as pos sible and marketing them early.

THERE never was a time when careful selection failed to give good results, especially when extra attention is given to the selection of the male. FEEDING wheat has a tendency to

produce a healthy growth, build up the muscular tissues and aid materially to cause the heus to lay plenty of rich eggs. TURKEYS do not bear confinement

well, whether young or old. When shut up they soon mope and droop their wings and begin to fall off in condition. EGGSHELLS are good for the fowls,

but they should be crushed very fine before feeding them. Otherwise you may introduce the egg-eating vice into the poultry yard. GEESE cost very little if allowed the

liberty of the fields, with access to a pond or stream. To attempt to make them profitable without these advantages will result in failure. ONE great recommendation that the larger breeds of fowls have over the

small ones is that the large ones have to stay where they are put, while the small ones go where they please. Ducks never have the cholera, roup nor gapes; hawks will not touch them; they lay more eggs that will hatch better than hen eggs. With good feed-

ing .- St. Louis Republic. TESTING THE EGGS.

ing they can readily be made to weigh

five pounds in ten weeks after hatch-

Too Much Attention Cannot Be Paid to

This Operation. This is a very important process. Contrary to what some people expect, necessary to feed them much milk. We all eggs will not hatch. The percenthave good success in feeding a por- age of a hatch is the number of chickens from the fertile eggs, not from the mixed and proportioned as follows: It occurs frequently that eggs are fertile but the germ is so weak that it Eggs should be tested on the fourth or fifth day and again on the tenth day. Leghorn, Minorca and Houdan eggs can be tested satisfactorily 26 or 48 hours after placing them in the incubator, but Brahma and other darkshelled eggs cannot be satisfactorily tested until the seventh day unless one is an expert and a very good egg-tester is used. A strong germ, says a writer, will show a small black spot with red veins radiating in all directions. Addled eggs will show cloudy detached black spots floating in the egg without any veins attached. A red circular line will be found in stale eggs. The latter must be removed or foul odors will be the result. An unfertile egg is perfectly clear and will be nearly as good as fresh-laid eggs for cooking purposes. On the tenth or twelfth day the chick begins to move and the eggs become more and more clouded. On the eighteenth day the egg is entirely opaque, except the small space called the aircell. The latter varies in size according to the larger or smaller amount of moisture used during incubation. By setting eggs under a hen at the same time as eggs are set in incubators, and comparing them every few days, an excellent idea can be obtained of the proper size of this air-cell.-Farmer's

HOUSE FOR POULTRY.

as to Be Comfortable All the Year Round.

The poultry house shown has an inderneath run, which serves to keep the hens cool in summer and warm in winter, as well as protecting them from sudden storms without the neces

in summer the rear of the underneath portion may be of wire instead of boards, or left open, as required. This house is intended for a flock in confinement, but will answer also for hens on a range, and may be of any size desired, the object here being to give the design only. It will cost a little more than a house that is close to the ground, but its advantages will more than compensate for its cost. The upper portion is intended for roosting and laying, though in summer the hens may lay in boxes in the underneath portion.-Farm and Home.

Wheat Chaff on the Floors. One of the best uses for wheat chaft s to use it on the floor of the poultry- To the assistant enters an Irishman. house. It may be three or four inches | He points to a pile of soap. thick, and serves several purposes, the first being to keep the floor always dry and clean, and the next is that if few millet seeds be scattered in the chaff, the hens will work and search ndustriously for the seeds. It is always fine, and is excellent for the manure heap when the float is cleaned off. Where wheat is grown, the chaff is the cheapest substance that can be frighten you. If you have no objecother food and thus compel them to used, and in the winter it will serve tions, I would like to call in a couple of off drafts of cold air along the floor .-

Farm and Fireside. Fate of the Ranch Horses. A western ranchman has recently sold some thousands of horses to be slaughtered and exported for food. per head. This is regarded as the forerunner of that which will eventually prove to be the fate of the vast majority of the horses now running on the ranches of the west

A SLAVE FROM BOYHOOD.

(From the Red Wing, Minn., Republican.) "I am now twenty-four years old," said Edwin Swanson, of White Rock, Goodhus county, Minn., to a Republican representative, "and as you can see I am not very large of stature. When I was eleven years old I became afflicted with a sickness which baffled the skill and knowledge of the physician. I was not taken suddenly ill, but on the contrary I can hardly state the exact time when it began. The first symptoms were pains in my back and restless nights. The disease did not trouble me much at first, but it seemed to have settled in my body to stay, and my bitter experi-ence during the last thirteen years proved that to be the case. I was of course a child, and never dreamed of the suffering in store for me. I complained to my parents and they concluded that in time I would outgrow my trouble, but when they heard me groaning during my sleep they became thoroughly alarmed. Medical ad-vice was sought but to no avail, I grew active breeds that are kept confined rapidly worse and was soon unable to move about and finally became confined continually to my bed. The best doctors that could be had were consulted, but did nothing for me. I tried various kinds of extensively advertised patent medicines with but the

same result. "For twelve long years I was thus a sufferer, in constant agony without respite, abscesses formed on my body in rapid suc-cession and the world indeed locked very dark to me. About this time when all hope was gone and nothing seemed left but to resign myself to my most bitter fate my attention was called to Dr. Williams' Pink Pills for Pale People. Like a drowning man grasping at a straw, in sheer despera-tion I concluded to make one more attempt -not to regain my health (I dare not to hope so much) but if possible to ease my

pain.

"I bought a box of the pills and they seemed to do me good. I felt encouraged and continued their use. After taking six boxes I was up and able to walk around the house. I have not felt so well for thirteen years as during the past year. Only one year have I taken Dr. Williams' Pink Pills and I am able now to do chores and attend

and I am able now to do chores and attend to light duties.

"Do I hesitate to let you publish what I have said? No. Why should I? It is the truth and I am only too glad to let other sufferers know my experience. It may help those whose cup of misery is as full to-day as mine was in the past."

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to

densed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are also a specific for troubles peculiar to females, such as suppressions, irregularities and all forms of weakness. They build up the blood, and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature. Pink Pills are sold in boxes (never in loose bulk) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams Medicine Company, Schenectady,

Made a Difference.

Mr. Waggles-Look here! What in the world do you mean by getting vourself a bloomer bicycle costume? Do you think I would allow you to go out on the street dressed like that? -Smothered Cabbage: Cut fine small head of cabbage. After the meat is fried put the cabbage in the frying pan with a little water, and salt and pepper to season: cover closely and cook fifteen or twenty minutes.-City and Country.

-Salad Eggs: Boil six eggs twenty minutes. Drop them into cold water before removing the shells. Cut into halves, remove the yolks and rub smooth with one tablespoonful of butter, one teaspoonful of mustard and salt. Add vinegar until soft and put back into the whites again.-Chicago Record.

-A good French dressing for lettuce, cucumber, green bean and watercress salads is made with four tablespoonfuls of oil, well seasoned with salt, powdered mustard and pepper. and two tablespoonsful of vinegar. Mix it thoroughly. Some people like a little of the crushed yolk of an egg stirred in, which is very good.-Chicago Tribune

-Chocolate Custards: Dissolve three ounces of grated chocolate over the fire in a little milk, and then add enough to measure a quart in all. Just before placing in a mold add a few drops of vanilla. When serving cold cup custards on a glass dish decorate each with a little dissolved raspberry jelly, and pour some whipped cream round.-Leed's Mer-

-Pickled Sturgeon: Cut the sturgeon in small pieces; wash it well, and tie in a cloth. To eight quarts of water add one quart of strong beer, salt, one ounce of ginger, two ounces of pepper, one ounce of cloves, and one ounce of Jamacia pepper; when the liquid boils put in the sturgeon; when done take it from the fire and allow to stand over night; add a quart of strong vinegar and salt. Cover closely .- Harper's Bazar.

-Chicken Fritters: Chop cold chicken, but not too fine, season with salt, pepper and a little lemon juice, mix all together well and let it stand one hour, make a batter of two eggs, one pint of milk, a little salt, and flour enough to make a good good batter: stir the chicken into this and drop it by spoonfuls into boiling fat; fry brown, drain well and serve hot; cold veal can be utilized in this way, and will be found nearly as nice as the chicken.-Prairie Farmer.

-St. Croix Salmon: Take the contents of a tin of salmon; spread it on a dish and look carefully for stray bones that may have been left in it. Drain off any liquid there may be, and divide it if it is not already in small pieces. Put two tablespoonfuls of butter in a hot frying-pan; when it is melted add the fish; sprinkle with pepper and salt. It may be allowed to brown, or merely heated through. Turn it out on a hot dish, garnish with parsley or watercress and serve.-Ladies' Home Jour-

pretty garnish for jellies and fancy puddings and are decorative mixed with other fruit. Select fine, even bunches of large cherry currants and dip them one at a time into a mixture made of a frothed white of egg and a very little cold water. Drain until nearly dry and then dip them in pulverized or confectioner's sugar. See that they are well covered and lay upon white paper to dry. Plums, cherries and grapes may be frosted in the same manner.-Orange Judd

THIN FABRICS.

Organdy and Swiss Vie with Each Other for Preference. Swiss comes in almost as many varieties as organdy. The meshes are rather too wide to admit of pretty pat-

terns in colors, but this difficulty is surmounted by making the patterns in silk of the same shade as the groundwork. A dainty pattern has a blue ground with silk dots and bow-knots in an all-over effect. But organdies are finer and come in such alluring patterns that it requires

firmness of purpose to resist them. An organdy gown over silk is correct for the most elaborate occasion. Made over white silk and trimmed with Valenciennes lace it is dainty for evening wear. For afternoon it is often made over dark silk to match some tint in the figure.

Modistes sometimes make up for the lack of flowers in the dotted Swiss by trimming them with wreaths and bunches of artificial flowers. One of the sweetest and freshest

gowns of this kind is a white-dotted Swiss made with a very wide skirt. It has bunches of roses set all around the bottom at intervals of about ten inches. The bodice is a round blouse fastened at the waist with a belt of ribbon that ties at the sides and hangs in long ends. Another busch of flowers is set on at the head of the bow. A mull collarette finishes the neck. It has a wreath of flowers around the neck, and another around the lower edge. The leghorn hat has a frill of lace standing up around the crown, and another which spreads out over the brim, with a velvet band to join them. A bunch of flowers is the only other trimming.-Chicago News.

The Wide Skirt Must Go.

Our prayers have been answered! The heavy, widely-distended skirts will very soon be a thing of the past. They are an abomination, and ought never to have been allowed to become fashionable. Why, it would take four hands to manipulate the folds in such a way as to keep the skirt out of the dust, and when a woman tries to accomplish the task with two her gown is soon forgotten in her cramped fingers, and she gives it up in despair. How anything so totally unfit to be worn in the street ever became a fashion is a mystery to everyone, except, perhaps, those who manufacture hair-cloth. But physicians have denounced the heavy linings as injurious to health, and this. with the men who have patiently tried to endure the burden for fashion's sake, has brought about a decided reaction against them, and the heavy skirt must go.-Philadelphia Times.

What It Was Meant For. Artist-I painted this picture, sir, to ep the wolf from the d Dealer (after inspecting it)-Well, hang it on the knob where the wolf can see it. - Pearson's Weekly.

-Continental Money: The continental money consisted of bills of credit issued by congress during the war of independence, which were to be redeemed with Spanish milled dollars. Two hundred million dollars' worth were issued, but they were never redeemed, and caused much suffering.

HALF-CURED eruptions will return. Eradicate them with Glenn's Sulphur Soap.
Hill's Hair and Whisker Dye, 50 cents. WHEN a man is wrong and won't admit it he always gets angry.—Haliburton.

FOR Whooping Cough, Piso's Cure is a successful remedy.—M. P. Dister, 67 Throop Ave., Brooklyn, N. Y., Nov. 14, 14.

A ROOM hung with pictures is a room hung BEFORE I could get relief from a most horease I had spent hundreds of dollars trying various remedies and physicians, none of which did me any good. My finger nails came off and

perfectly bald. I then went to

my hair came out, leaving me

treatment, but very soon became disgusted and decided to try S.S.S. The effect was truly wonderful. I commenced to recover at once, and after I had taken twelve bottles I was entirely cured—cured by S.S.S. when the world-renowned Hot Springs had failed.

easier work, quicker work, better

work, safety, economy. There's

not one thing against it. What's

the use of washing in the hardest

How it looks. to the women who wash with Pearline, when they see a woman washing in the old-fashioned way with soap-rubbing the clothes to pieces, rubbing away her strength, wearing herself out over the washboard! To these Pearline women, fresh from easy washing, she seems to "wear a fool's cap unawares." Everything's in favor of Pearline-
